FORM 2
MCH BUDGET DETAILS FOR FY 2011

[Secs. 504 (d) and 505(a)(3)(4)]

STATE: FL

1. FEDERAL ALLOCATION

(Item 15a of the Application Face Sheet [SF 424])

Of the Federal Allocation (1 above), the amount earmarked for:

A.Preventive and primary care for children:

\$ 6,707,702 (35%)

B.Children with special health care needs:

\$ 6,383,712 (33.31%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 1,916,732 (10%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

\$ 19,167,334

2. UNOBLIGATED BALANCE (Item 15b of SF 424)

\$ 0

3. STATE MCH FUNDS (Item 15c of the SF 424)

\$ 169,587,823

4. LOCAL MCH FUNDS (Item 15d of SF 424)

\$ 0

5. OTHER FUNDS (Item 15e of SF 424)

\$ 0

6. PROGRAM INCOME (Item 15f of SF 424)

\$ 0

7. TOTAL STATE MATCH (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 155,212,322

\$ 169,587,823

8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 188,755,157

9. OTHER FEDERAL FUNDS

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 93,713

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 388,339,208

h. AIDS: \$ 0

i. CDC: \$ 13,613,334

j. Education: \$ 0

k. Other: \$ 0

Others see notes) \$ 33,421,773

USDA CACFP grant \$ 151,018,244

10. OTHER FEDERAL FUNDS (SUBTOTAL of all Funds under item 9)

\$ 586,486,272

11. STATE MCH BUDGET TOTAL

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 775,241,429

TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2011
[SEC. 506(A)(1)]
STATE: FL

1. State MCH Administration:
(max 2500 characters)

The Department of Health is the agency responsible for the administration of the Title V program in Florida. Maternal and child health responsibilities are divided between Family Health Services (pregnant women and children) and Children's Medical Services (children with special health care needs). The Department of Health administers health programs through its county health departments and Children's Medical Services offices. Healthy Start continues to be our priority maternal and child health initiative in Florida. Healthy Start is designed to ensure access to maternal and child health services to all women and children in Florida. Other efforts to improving maternal and child health include services to substance exposed newborns, Fetal and Infant Mortality Review projects, improving pregnancy outcomes, prenatal smoking cessation, and pregnancy associated mortality review. Services for children with special health care needs include the Early Intervention Program, high risk obstetrical satellite clinics, Regional Perinatal Intensive Care Centers and clinic-based medical and therapeutic care.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 19,167,334
3. Unobligated balance (Line 2, Form 2)	\$ 0
4. State Funds (Line 3, Form 2)	\$ 169,587,823
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 0
8. Total Federal-State Partnership (Line 8, Form 2)	\$ 188,755,157

9. Most significant providers receiving MCH funds:

Healthy Start Coalitions

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	125,176
b. Infants < 1 year old	63,024
c. Children 1 to 22 years old	283,075
d. CSHCN	83,210
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

(max 2500 characters)

Children's Medical Services Integrated Service Delivery Network - A comprehensive continuum of medical and supporting services to eligible individuals with special health care needs. The system of care is a statewide integrated network of providers that includes local, regional and tertiary care facilities. Providers and families are supported through a case management system that includes nurse case managers, social workers and health care professionals. The service continuum includes prevention, early intervention, primary care and medical and therapeutic care. Child Health Services for Children under 1 - Child Health Services are provided mainly by the County Health Departments and include immunizations, periodic health history and physical examinations, laboratory screening tests for health indicators such as lead and anemia, developmental screening, risk assessment, parent education, accident prevention and substance abuse prevention education. Child Health is funded 100% by Title V.

b. Population-Based Services:

(max 2500 characters)

Pregnancy Associated Mortality Review (PAMR) project - a population-based surveillance and selective case review process that monitors trends in pregnancy associated deaths, and identifies gaps in care and systematic service delivery problems. Fetal and Infant Mortality Review (FIMR) Project - a community-based effort to provide quality improvement mechanisms that identify medical, psychosocial, environmental and structural factors that may contribute to fetal and infant deaths. Healthy Start Prenatal Screening - used to identify pregnant women who have an increased risk of pregnancy complications or poor birth outcomes due to environmental, medical, nutritional, or behavioral risk factors. Every pregnant woman is eligible for the screening process. Women at-risk may be eligible for care coordination and other services, based on need and local resources. Healthy Start Infant Screening - used to identify infants who are at increased risk of poor health or adverse development due to environmental, medical, nutritional, or behavioral risk factors. Every infant born in Florida is eligible for the screening process.

c. Infrastructure Building Services:

(max 2500 characters)

Healthy Start Coalitions - There are 30 Healthy Start Coalitions covering 64 of the 67 counties in Florida to ensure local leadership and planning for a system of care, to promote optimum health outcomes for pregnant women and infants. Additional capacity is provided through partnerships with the private sector, the public sector, state government, local government, community alliances, and maternal and child health care providers. Healthy Start Evaluation - The Healthy Start program includes an evaluation component of all Healthy Start services. This includes tracking the number of participants who receive Healthy Start services and comparing these numbers to indicators of improved pregnancy outcomes or infant developmental outcomes such as infant mortality, entry into prenatal care, and the number of sudden infant deaths.

Year: 2008

Field Note:

Data for 2008 comes from the 2005/2006 Florida State Profile data for CSHCN survey.

3. **Section Number:** Form11_Performance Measure #6

Field Name: PM06

Row Name:

Column Name:

Year: 2007

Field Note:

Indicator data comes from the National Survey of CSHCN, conducted by HRSA and CDC, 2005-2006. Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #06 and the 2005-2006 may be considered baseline data.

PERFORMANCE MEASURE # 07

Percent of 19 to 35 month olds who have received full schedule of age appropriate immunizations against Measles, Mumps, Rubella, Polio, Diphtheria, Tetanus, Pertussis, Haemophilus Influenza, and Hepatitis B.

Data for 2009 are not yet available. The Department of Health does not track breastfeeding data in the general population. The department has previously reported survey data from Ross Laboratories. Prior to 2005, the Department reported Ross data for the percentage of mothers in Florida who were breastfeeding in the hospital. In 2005, the Department began reporting Ross data for the percentage of mothers who were breastfeeding their infants at six months of age. However, Ross Laboratories has now ceased to conduct their Infant Feeding survey so data is no longer from this source. The Department now uses data provided by the CDC based on the National Immunization Survey. The CDC data is based on children born in 2004 and interviewed through November 2008.

2. Section Number: Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2008**Field Note:**

3. Section Number: Form11_Performance Measure #11**Field Name:** PM11**Row Name:****Column Name:****Year:** 2007**Field Note:**

The Department of Health does not track breastfeeding data in the general population. Prior to 2005, the Department reported Ross data (collected from the annual Infant Feeding Survey conducted by Ross Laboratories) for the percentage of mothers in Florida who were breastfeeding in the hospital. Beginning with the data for 2005, the Department began reporting Ross data for the percentage of mothers who were breastfeeding their infants at six months of age. The data source changed in 2006 when Ross Laboratories ceased to conduct their annual Infant Feeding Survey. At this time, the Department began using data provided by the Centers for Disease Control (CDC) which is obtained from the National Immunization Survey. The CDC data presents breastfeeding information according to the year of the child's birth. The data reflected in the chart above under 2007 is still information collected on children born in 2004 and obtained in interviews conducted through December 2006.

PERFORMANCE MEASURE # 12

Percentage of newborns who have been screened for hearing before hospital discharge.

Field Level Notes1. **Section Number:** Form11_Performance Measure #18**Field Name:** PM18**Row Name:****Column Name:****Year:** 2007**Field Note:**

Starting in 2004 trimester prenatal care began to be calculated as the time elapsed from the date of the last menstrual period to the date of the first prenatal care visit. Prior to 2004 these data were obtained by direct question that noted the trimester the mother began prenatal care. Consequently these data are not comparable to data from prior years. Births with unknown information as to when prenatal care began are excluded from the denominator. Annual performance objectives have been lowered to accommodate the change in data collection.

FORM 14
LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: FL FY: 2011

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women," and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Prevent unintended and unwanted pregnancies.
2. Promote preconception health screening and education.
3. Promote safe and healthy infant sleep behaviors and environments.
4. Prevent teen pregnancy.
5. Improve dental care access, both preventative and treatment, for children.
6. Increase access to medical homes and primary care for all children, including children with special health care needs.
7. Improve health care transition for adolescents and young adults with special health care needs to all aspects of adult life.
8. Increase early intervention services for children with special health care needs.

FIELD LEVEL NOTES

None

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: FL

SP(Reporting Year) # 1

PERFORMANCE MEASURE:

The percentage of Part C eligible children receiving service

STATUS:

Active

GOAL

To increase the number of eligible children who receive a service.

DEFINITION

Numerator:

Number of eligible children who receive a service.

Denominator:

Number of children eligible.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

21.5 Clinical preventive services from publicly funded programs

DATA SOURCES AND DATA ISSUES

Department of Health data

SIGNIFICANCE

Increasing the percentage of Part C eligible children receiving a service has a positive effect on the outcome measures related to reducing infant, neonatal, postneonatal and perinatal morbidity.

SP(Reporting Year) # 2

PERFORMANCE MEASURE:

The percentage of subsequent births to teens age 15 to 19

STATUS:

Active

GOAL

To lower the percentage of subsequent births to teens age 15 to 19.

DEFINITION

Numerator:

Numerator: Number of females under 19 with a second or higher order birth in the last five years.

Denominator:

Denominator: Number of live births to females age 15-19 in the calendar year.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 5.1

Reduce repeat births among females age 15-19.

DATA SOURCES AND DATA ISSUES

Vital records are the source of data on mother's age and births. Population numbers are determined from Vital Statistics records of teens with a second or higher order birth.

SIGNIFICANCE

DHHS made teen pregnancies a priority goal (a major threat to healthy and productive lives) in their 1997 strategic plan. A second teen birth is associated with the lack of high school completion, inability to work, solidifying the cycle of poverty for young mothers, and creating welfare dependency.

SP(Reporting Year) # 3

PERFORMANCE MEASURE:

The percentage of women reporting tobacco use during pregnancy

STATUS:

Active

GOAL

To decrease the percentage of women who report tobacco use during pregnancy on the certificate of live birth.

DEFINITION

Numerator:

Number of women who report tobacco use on the certificate of live birth.

Denominator:

Number of births in Florida.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

3.7 Smoking cessation during pregnancy

Increase smoking cessation during pregnancy so that at least 60 percent of women who are cigarette smokers at the time they become pregnant quit smoking early in pregnancy and maintain abstinence for the remainder of their pregnancy.

DATA SOURCES AND DATA ISSUES

The data source is the Florida Department of Health, Vital Statistics Office. The data is taken directly from the Certificate of Live Birth data.

SIGNIFICANCE

Reducing tobacco use during pregnancy has a positive effect on reducing the infant, neonatal, postneonatal and perinatal mortality rates and on lowering the number of low birth weight deliveries..

SP(Reporting Year) # 4

PERFORMANCE MEASURE:

The percentage of low-income children who access dental care

STATUS:

Active

GOAL

To increase access to dental services for low-income children in order to provide clinical preventive and treatment services needed to improve and maintain oral health.

DEFINITION

Numerator:

Number of children who receive services through Medicaid providers, county health departments and community health centers.

Denominator:

The number of low-income children below 200% of the federal poverty level.

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

13.2 Untreated dental caries

Reduce untreated dental disease to no more than 20 percent among children 6 through 8 and no more than 15 percent among adolescents age 15.

DATA SOURCES AND DATA ISSUES

Data are compiled from annual ad hoc reports provided by the Medicaid program, from county health department data maintained by the Public Health Dental Program, and community health center data extracted from the annual Uniform Data System report.

SIGNIFICANCE

Low-income children are at high risk for dental disease because of the lack of access to professional care. Dental caries is the most common chronic disease of children, but amenable to early intervention. Early dental disease can be reversed and more advanced disease can be treated before it progresses to pain, infection and the need for more expensive intervention.

SP(Reporting Year) # 5

PERFORMANCE MEASURE:

The percentage of pregnant women screened by Healthy Start

STATUS:

Active

GOAL

To achieve universal screening that will identify pregnant women who are at increased risk for preterm delivery or who are at increased risk for delivering a low birth weight infant.

DEFINITION

Numerator:

Number of screens completed

Denominator:

Number of births for same time period

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

14.5 Low birth weight

Reduce low birth weight to an incidence of no more than 5 percent of live births and very low birth weight to no more than 1 percent of live births.

DATA SOURCES AND DATA ISSUES

The data source is the Florida Department of Health, Vital Statistics Office. In previous years, objectives related to Healthy Start prenatal screening rates have been measured by the percent of women offered the screening. Recent data analysis has focused instead on the number/percent of women actually screened. This number is generated by using the number of births for the same time period as the denominator. This results in a much lower rate, but ultimately the one that shows participation in prenatal risk screening. This denominator used is a proxy for the estimated number of pregnant women because in Florida there is not a data system that captures the actual number of pregnant women. Thus, although this is an imperfect measure, used over time it should provide an indication of improvement or lack of improvement of the prenatal screening rates.

SIGNIFICANCE

The ability to identify high risk pregnant women is critical to the ability to assess and provide interventions to address the identified risk factors and improve pregnancy outcomes. Additionally, the data collected through the prenatal screening process enables the statewide analyses of risk factors for pregnant women in Florida.

PERFORMANCE MEASURE:	The percentage of infants screened by Healthy Start
STATUS:	Active
GOAL	To achieve universal screening that will identify infants who are at increased risk for post-neonatal death.
DEFINITION	<p>Numerator: Number of screens completed</p> <p>Denominator: Number of births for same time period</p> <p>Units: 100 Text: percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>14.1 Infant mortality</p> <p>Reduce the infant mortality rate to no more than 7 per 1,000 live births.</p>
DATA SOURCES AND DATA ISSUES	The data source is the Florida Department of Health, Vital Statistics Office. The data for the infant screen is taken directly from the Certificate of Live Birth.
SIGNIFICANCE	The ability to identify high-risk infants is critical to the ability to assess and provide interventions to address the identified risk factors and improve outcomes during the first year of life. Additionally, the data collected through the infant screening process enables the statewide analyses of risk factors for infants in Florida.

SP(Reporting Year) # 7

PERFORMANCE MEASURE:

The rate per 1,000 of hospital discharges due to asthma in children 0-14

STATUS:

Active

GOAL

To reduce the number of hospitalizations due to asthma in children age 0-14.

DEFINITION

Numerator:

Number of hospital discharges due to asthma in children age 0-14

Denominator:

Total population of children age 0-14

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

11.1 Asthma hospitalizations

Reduce asthma morbidity among children, as measured by a reduction in asthma hospitalizations to no more than 225 per 100,000 people.

DATA SOURCES AND DATA ISSUES

Hospital discharge data

SIGNIFICANCE

Asthma affects over 100 million people worldwide and creates a burden in health care costs, lost productivity, increased absenteeism from school, and reduced participation in family life. Asthma prevalence is increasing most rapidly among children, especially where urbanization is taking place. Effective asthma management and prevention can prevent costly hospitalizations, and decrease school and work absenteeism.

SP(Reporting Year) # 8

PERFORMANCE MEASURE:

Excess feto-infant mortality attributed to the maternal health/prematurity category in the PPOR statewide analysis.

STATUS:

Active

GOAL

To decrease the excess feto-infant death attributable to maternal health/prematurity.

DEFINITION

Using the Perinatal Periods of Risk Analysis, when compared to a statewide reference group, the excess fetal deaths with gestational ages 24 weeks or greater and fetal and infant deaths with birth weights of 500 grams or greater that are attributable to the maternal health/prematurity category. Units: Difference in excess feto-infant mortality between reference group and non-reference group.

Numerator:

Denominator:

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-1a

Fetal deaths at 20 or more weeks of gestation (Baseline 6.8 in 1997)

Objective 16-1b

Fetal and infant deaths during perinatal period (28 weeks of gestation to 7 days or more after birth) (Baseline 7.5 in 1997)

DATA SOURCES AND DATA ISSUES

Birth records matched to infant death records and fetal death records.

SIGNIFICANCE

Recent perinatal periods of risk analysis have indicated that there is substantial opportunity for improvement in the area of maternal health and prematurity. Preconceptional and interconceptional care for women may result in lower excess rates of feto-infant death attributable to this category.

FORM NOTES FOR FORM 18

None

FIELD LEVEL NOTES

1. **Section Number:** Form18_Indicator 06 - SCHIP
Field Name: SCHIP_Women
Row Name: Pregnant Women
Column Name:
Year: 2011
Field Note:
In Florida, pregnant women are not eligible for SCHIP coverage.
2. **Section Number:** Form18_Indicator 05
Field Name: CareFirstTrimester
Row Name: Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester
Column Name:
Year: 2011
Field Note:
Percent of infants born to women who began care in the first trimester differs from the values provided on Form 11 NPM #18 because births with unknown linking information are excluded.
3. **Section Number:** Form18_Indicator 05
Field Name: AdequateCare
Row Name: Percent of pregnant women with adequate prenatal care
Column Name:
Year: 2011
Field Note:
Data for "all" column differ from numbers reported elsewhere in report, as this data comes from a different source. Source for this data looks at matched data files that exclude those without an SSN number. In the case of multiple births, multiple births are counted as one delivery, further skewing the results. Data for this indicator is more accurately reflected on Form 17.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: FL

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	1	No
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	2	Yes
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

*Where:

1 = No, the MCH agency does not have this ability.

2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.

3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: FL

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other: Florida Youth Tobacco Survey	3	No

*Where:
1 = No
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Notes:
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

FORM NOTES FOR FORM 19

FIELD LEVEL NOTES

- 1. Section Number:** Form21_Indicator 09A
Field Name: HSIRace_Children
Row Name: All children 0 through 19
Column Name:
Year: 2011
Field Note:
"All", "White", and "Black" estimates come from 2009 Florida CHARTS population projections: <http://www.floridacharts.com/charts/population.aspx>. Estimates for the total number in the other racial and ethnic groups come from the 2006-2008 American Community Survey: http://factfinder.census.gov/servlet/CustomTableServlet?_ts=195386930898. This total number is then converted to a percentage of the total Florida 0-19 year old population using the 2008-08 American Community Survey. This proportion is then applied to the "Total All Races" in Column 1, Row 1 of this form, and the resulting number deducted from the "Other and unknown" in Column 9, Row 1 and placed in the proper race column of Row 1. When the total from the American Community Survey generated estimates is greater than the "Other and unknown" in Column 9, Row 1, then a "0" is placed in this cell, and the American Community Survey generated estimates are recalculated in proportion to the "Other and unknown" total.
- 2. Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2011
Field Note:
Estimated based on the 2006 American Community Survey: http://factfinder.census.gov/servlet/IPCharIterationServlet?_ts=195391731667. Percent of children under 18 living in single-parent female household: The number of race or ethnicity category households multiplied by the percentage of female/male only households, where there is no husband/wife, but there is a child <18 years that is her/his own; divided by the total number of children in race or ethnic category.
- 3. Section Number:** Form21_Indicator 09A
Field Name: HSIRace_TANFPercent
Row Name: Percent in TANF (Grant) families
Column Name:
Year: 2011
Field Note:
Total TANF participants in 2009 were 73,357
- 4. Section Number:** Form21_Indicator 09A
Field Name: HSIRace_MedicaidNo
Row Name: Number enrolled in Medicaid
Column Name:
Year: 2011
Field Note:
The source for this data includes Hispanic as a race. To estimate counts that would include Hispanic ethnicity in the race categories, The Florida Department of Health, Office of Planning, Evaluation, and Data Analysis provided projections for the 2009 population of 0-19 year olds by race-ethnicity. The proportion of Hispanics were calculated by race from the Office of Planning, Evaluation, and Data Analysis projections. These proportions were then applied to the count of Hispanics provided by the data source. These values were then added to the appropriate race category above to attain a total under each race category that included Hispanic ethnicity. Finally, this count value was used to calculate column percentages. For 2009, the projected percentage of Hispanics that were White was 94.39%; the percentage of Hispanics that were Black was 4.29%; and the percentage of Hispanics that were Other was 1.32%.
- 5. Section Number:** Form21_Indicator 09A
Field Name: HSIRace_SCHIPNo
Row Name: Number enrolled in SCHIP
Column Name:
Year: 2011
Field Note:
The source for this data includes Hispanic as a race. To estimate counts that would include Hispanic ethnicity in the race categories, The Florida Department of Health, Office of Planning, Evaluation, and Data Analysis provided projections for the 2009 population of 0-19 year olds by race-ethnicity. The proportion of Hispanics were calculated by race from the Office of Planning, Evaluation, and Data Analysis projections. These proportions were then applied to the count of Hispanics provided by the data source. These values were then added to the appropriate race category above to attain a total under each race category that included Hispanic ethnicity. Finally, this count value was used to calculate column percentages. For 2009, the projected percentage of Hispanics that were White was 94.39%; the percentage of Hispanics that were Black was 4.29%; and the percentage of Hispanics that were Other was 1.32%.
- 6. Section Number:** Form21_Indicator 09A
Field Name: HSIRace_JuvenileCrimeRate
Row Name: Rate (per 100,000) of juvenile crime arrests
Column Name:
Year: 2011
Field Note:
When an estimate cannot be provided for a specific race category, then the overall value for all races is used. In the case of counts, the estimated numbers based on the overall value is subtracted from the "Other and Unknown" column value.
- 7. Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_Children
Row Name: All children 0 through 19
Column Name:
Year: 2011
Field Note:
The population of Florida's Hispanic and non-Hispanic came from 2009 state projections provided by The Florida Department of Health, Office of Planning, Evaluation, and Data Analysis.
- 8. Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_SingleParentPercent
Row Name: Percent in household headed by single parent
Column Name:
Year: 2011
Field Note:
Estimated based on the 2006-08 American Community Survey: http://factfinder.census.gov/servlet/DatasetMainPageServlet?_program=ACS&_submenuId=&_lang=en&_ts= Percent of children under 18 living in single-parent female/male only household: The number of race or ethnicity category households multiplied by the percentage of female/male households, where there is no husband/wife, but there is a child <18 years that is her/his own; divided by the number of children in race or ethnic category.
- 9. Section Number:** Form21_Indicator 09B
Field Name: HSIEthnicity_TANFPercent
Row Name: Percent in TANF (Grant) families

Column Name:

Year: 2011

Field Note:

Total TANF participants in 2009 was 62,838.

10. Section Number: Form21_Indicator 09B

Field Name: HSIEthnicity_JuvenileCrimeRate

Row Name: Rate (per 100,000) of juvenile crime arrests

Column Name:

Year: 2011

Field Note:

Estimation of Non-Hispanic percentage of high school drop-outs, based on the 2009 reported percentage of 3.1% for Hispanic/Latinos and the 2009 overall 2.6% drop-out rate for all races in Row 11, Column 1 of HIS #09A. $(3.1+X)/2=2.6$; $X=2.1$

11. Section Number: Form21_Indicator 09B

Field Name: HSIEthnicity_DropOutPercent

Row Name: Percentage of high school drop-outs (grade 9 through 12)

Column Name:

Year: 2011

Field Note:

Estimation of Non-Hispanic percentage of high school drop-outs, based on the 2009 reported percentage of 3.1% for Hispanic/Latinos and the 2009 overall 2.6% drop-out rate for all races in Row 11, Column 1 of HIS #09A. $(3.1+X)/2=2.6$; $X=2.1$

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: FL

SP(New for Needs Assessment cycle 2011-2015) # 1

PERFORMANCE MEASURE: The percentage of Part C eligible children receiving service
STATUS: Active
GOAL To increase the number of eligible children who receive a service.
DEFINITION

Numerator:
Number of eligible children who receive a service.
Denominator:
Number of children eligible.
Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE 21.5 Clinical preventive services from publicly funded programs

DATA SOURCES AND DATA ISSUES Department of Health data

SIGNIFICANCE Increasing the percentage of Part C eligible children receiving a service has a positive effect on the outcome measures related to reducing infant, neonatal, postneonatal and perinatal morbidity.

SP(New for Needs Assessment cycle 2011-2015) # 2

PERFORMANCE MEASURE:

The percentage of births with inter pregnancy interval less than 18 months.

STATUS:

Active

GOAL

To increase time intervals between pregnancies.

DEFINITION

The percentage of births with inter pregnancy interval less than 18 months.

Numerator:

Number of women who have a subsequent birth within 18 months of a previous delivery.

Denominator:

Number of live births in the calendar year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Related to 9-2: Reduce the proportion of births occurring within 24 months of a previous birth.

DATA SOURCES AND DATA ISSUES

The data source is the Florida Department of Health, Vital Statistics Office. The data is taken directly from the Certificate of Live Birth data.

SIGNIFICANCE

Increasing the time interval between pregnancies lowers the risk of adverse perinatal outcomes, including low birth weight, preterm birth, and small-for-size gestational age.

PERFORMANCE MEASURE:	The percentage of women having a live birth who received preconception counseling about healthy lifestyle behaviors and prevention strategies from a health care provider prior to pregnancy.
STATUS:	Active
GOAL	To increase the number of women who received preconception screening and counseling prior to pregnancy.
DEFINITION	<p>Of those women who gave birth in the calendar year reported, the percentage of women who received preconception counseling</p> <p>Numerator: Women having a live birth who received preconception counseling on 11 topics prior to pregnancy.</p> <p>Denominator: Number of live births in the calendar year.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Related to 16-10 Reduce low birth weight (LBW) and very low birth weight (VLBW).</p> <p>Related to 16-11 Reduce preterm births.</p>
DATA SOURCES AND DATA ISSUES	An optional question on preconception health counseling with a listing of 11 preconception health topics on Phase 6 PRAMS Survey in Florida starting in 2009.
SIGNIFICANCE	Improving the preconception health of women prior to pregnancy is believed to be the best new strategy to improve perinatal and child health. This includes promoting family planning and birth spacing, ceasing substance abuse, managing chronic conditions, and improving health behaviors.

PERFORMANCE MEASURE:	The percentage of infants not bed sharing.
STATUS:	Active
GOAL	To increase the number of infants who do not often share a common bed surface with others when sleeping.
DEFINITION	<p>Measure of the percentage of infants who do not share a common bed with others.</p> <p>Numerator: Statistically weighted number of live births to PRAMS respondents who are most often do not sleep in the same bed as others.</p> <p>Denominator: Statistically weighted number of live births to PRAMS respondents in the calendar year.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	Related to 16-13: Increase the percentage of healthy full-term infants who are put down to sleep on
DATA SOURCES AND DATA ISSUES	Phase 5 and 6 PRAMS Survey in Florida starting in 2004.
SIGNIFICANCE	Infants who share a common bed surface with others are at risk for suffocation, positional asphyxia, and strangulation. In addition, they are also at increased risk of SIDS.

PERFORMANCE MEASURE:	The percentage of infants back sleeping.
STATUS:	Active
GOAL	To increase the number of infants who are placed most often on their backs to sleep.
DEFINITION	<p>The percentage of infants back sleeping.</p> <p>Numerator: Statistically weighted number of live births to PRAMS respondents who are most often place infants on their back to sleep.</p> <p>Denominator: Statistically weighted number of live births to PRAMS respondents in the calendar year.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	16-13: Increase the percentage of healthy full-term infants who are put down to sleep on their backs
DATA SOURCES AND DATA ISSUES	Phase 6 PRAMS Survey in Florida starting in 2009.
SIGNIFICANCE	Placing an infant on their back to sleep greatly reduces the risk of SIDS in both healthy full-term and preterm infants.

PERFORMANCE MEASURE:	The percentage of teen births, ages 15-17, that are subsequent (repeat) births.
STATUS:	Active
GOAL	To lower the percentage of subsequent births to teens age 15 to 17.
DEFINITION	<p>Measures the percentage of teen births, ages 15-17, that are subsequent (repeat) births.</p> <p>Numerator: Number of females age 15-17 under with a second or higher order birth. For multiple births only the first of the multiple births are used in this measure.</p> <p>Denominator: Number of live births to females ages 15-17 in the calendar year.</p> <p>Units: 100 Text: Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Related to 9-7 Reduce pregnancies among adolescent females.</p> <p>Related to 9-10. Increase the proportion of sexually active, unmarried adolescents aged 15 to 17 years who use contraception that both effectively prevents pregnancy and provides barrier protection against disease.</p>
DATA SOURCES AND DATA ISSUES	Birth certificates are the source of data on mother's age, births, and teen with a second or higher order birth.
SIGNIFICANCE	A second teen birth is associated with the lack of high school completion, inability to work, solidifying the cycle of poverty for young mothers, creating welfare dependency, and increased risk of infant mortality.

PERFORMANCE MEASURE:	The percentage of low-income children who access dental care
STATUS:	Active
GOAL	To increase access to dental services for low-income children in order to provide clinical preventive and treatment services needed to improve and maintain oral health.
DEFINITION	<p>Numerator: Number of children who receive services through Medicaid providers, county health departments and community health centers.</p> <p>Denominator: The number of low-income children below 200% of the federal poverty level.</p> <p>Units: 100 Text: percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>13.2 Untreated dental caries</p> <p>Reduce untreated dental disease to no more than 20 percent among children 6 through 8 and no more than 15 percent among adolescents age 15.</p>
DATA SOURCES AND DATA ISSUES	Data are compiled from annual ad hoc reports provided by the Medicaid program, from county health department data maintained by the Public Health Dental Program, and community health center data extracted from the annual Uniform Data System report.
SIGNIFICANCE	Low-income children are at high risk for dental disease because of the lack of access to professional care. Dental caries is the most common chronic disease of children, but amenable to early intervention. Early dental disease can be reversed and more advanced disease can be treated before it progresses to pain, infection and the need for more expensive intervention.

OUTCOME MEASURE:	Pregnancy-related death ratio per 100,000 live births.
STATUS:	Active
GOAL	To reduce the number of pregnancy-related deaths.
DEFINITION	Measures the number of pregnancy-related deaths in Florida. Numerator: Number of pregnancy-related deaths as determined by review of the Florida Pregnancy Associated Mortality Review Committee. Denominator: Number of live births. Units: 100000 Text: Rate
HEALTHY PEOPLE 2010 OBJECTIVE	Objective 16-4: Reduce maternal deaths. Target for 2010: 3.3 maternal deaths per 100,000 live births. (Baseline: 7.1 in 1998)
DATA SOURCES AND DATA ISSUES	Pregnancy Associated Mortality Review (PAMR) data base and vital records collected by the state.
SIGNIFICANCE	Pregnancy-related mortality is a reflection of the health status and treatment of the mother prior to and during pregnancy.
